Key Benefits of Louws Stellar Meeting Presentation Performance™ Training

The ability to give 21st Century persuasive presentations no longer relies exclusively on the ability to establish a fixed time frame, have everyone pitch up at the appointed hour, and listen attentively for the prescribed period.

Today it's how well can you hold a group engrossed with their Blackberries™, chronically late for their meetings, constantly being pulled out of the presentation -- and what about those remote telephone, jpeg and power-point™ presentations? Louws has adapted to the times and developed specific techniques to address the myriad of presentation formats facing all of us in the 21st Century and beyond.

This Workshop places Emphasis on teaching executives to:

- ◆ Dramatically improve "Stage Presence"
- ◆ Excel at getting ones point across remotely using the telephone, jpegs, remote power-point™ phone presentations.
- ◆ Dramatically improve ability to excite, work and manage an audience
- ◆ Improve ability to get one's message clearly and succinctly understood and bought by the audience
- ◆ Inspire groups to come to the predetermined outcome(s) of the speaker

As a result of understanding the answers to why meeting presentation skills training is so unproductive, the presentation skills *technology* that Louws teaches students achieves not only immediate results, but lasts for a lifetime. It also allows each student, within the context of their own personality, to excel at giving stellar meeting presentations.

It has been the focus on the cause and not the symptom that has elevated the Louws Stellar Meeting Presentation Performance SM Training Technology into a class that no other training program can match or even copy.
